

35% Shade Cloth

Our Raschel Knitted Shade Cloth is a technical textile knitted from virgin HDPE tapes. Its construction prevents fraying and tearing when tapes are cut, ensuring lasting resistance for a longer lifetime and a uniform shading over the covered area. Available in a wide range of options according to specific needs, our solutions have been tested for decades and fitted for each application, from agriculture to architectural shading structures.

General Characteristics

The composition of our shade cloths delivers a lifetime expected of a product designed and manufactured to the highest quality standards. Marienberg's formulas minimize UV degrading of the polymers, ensuring a higher durability in harsh outdoor conditions against seemingly similar products.

Main Uses

Our Raschel Knitted 35% Shade Cloth can be used for light crop shading, fruit harvesting and temperature control in greenhouses, as well as a windbreaker.

Warehousing Guidelines

The product must be stocked in a clean, dry place at room temperature, away from direct sunlight or UV radiation until its use. It must also be kept away during its lifetime from direct contact with energetic oxidants and aliphatic carbohydrates, halogenated or aromatic. If these guidelines are followed and the product is kept in its original packaging, it can last indefinitely until its use.

Standard Technical Specifications

Recyclable

Solid Shade Cloth			
Size (m)		Volume (m ³ /roll)	Available colors
Width*	Length		
2.10	100	0.10	White, black and other colors to order**
4.20	100	0.18	
8.20	100	0.39	

Stabilized to withstand 600 kLy UV radiation.

* Special widths up to 9m/29.5 ft.
